# VACUTRON SUCTION REGULATORS by Allied

The new, sleekly contoured Vacutron® is a precision engineered instrument that combines the most desirable features for suction regulators. Smaller in size, but big on benefits, it offers advantages that include:

Slimmer line saves space, yet model is more durable than ever.

Color-coded glow-in-the-dark gauge face provides easy readability under any conditions. Gauge is secured by a screw for durability.

Weight-bearing brass post prevents case from cracking. Various inlet and outlet fittings insure compatibility with existing fixtures in any medical facility.

Easy access ON/OFF Soft-Touch knob gives full-line capability on the surgical model.

Maintenance is easy. Clean by flushing with cold sterilant.

0-200 mmHg is achieved easily with minimal turning of the knob. Vacuum-limiting valve on the continuous model limits vacuum at 300 mmHg to prevent potential tissue damage.

New larger Soft-Touch knob for quick, fumble-free action. Exposed bottom allows thumb-wheel adjustment. Oversized knob for easy operation.

**Position Increments (LPM)**  
Off, .50, 1, 2, 3, 4, 5, 6, 8, 10, 15

**It's Durable** - The lack of a flow tube and the durable metal body prevents breakage problems long associated with standard flowmeters.

**It's Compact** - The compact size allows the unit to fit into tight headwall areas and makes it virtually damage proof when other equipment is installed.

**It's Accurate** - The patented multi-spring technology insures accuracy at every flow setting without the need for a visible float as in Thorpe tube flowmeters

**It's User-Friendly** - The knurled flow adjustment knob and the large, easy-to-read numbers make flow adjustment easy.

**It's Versatile** - The unit is available for headwall outlets as well as for ceiling mount drops. Both air and oxygen models are available.
